Patent Interference No. 105,532 (Technology Center 1600)

Before: FRED E. McKELVEY, Senior Administrative Patent Judge, and RICHARD TORCZON and SALLY GARDNER LANE, Administrative Patent Judges. 2 4 LANE, Administrative Patent Judge. 5 6 Judgment - Priority - Bd. R. 127(a) 7 Short had indicated that it will not contest priority. (Paper 20 at 2). Each of the 8 9 threshold motions filed by Short (Bd. R. 201) has been denied. (Paper 63). Judgment on priority shall be entered against Short. 10 11 Upon consideration of the record and for reasons given, it is ORDERED that judgment on priority as to Count 1, the sole count of the 12 13 interference, is entered against junior party Short;

FURTHER ORDERED that claims 1-12 of Short patent 6,605,449, which claims correspond to Count 1 (Paper 1 at 4), are CANCELLED (35 U.S.C. § 135(a)); FURTHER ORDERED that the parties note the requirements of 35 U.S.C. § 135(c) and Bd.R. 205; RECOMMENDED (see Bd. R. 127(c)) that, upon the return of the Patten application to ex parte prosecution, the Examiner consider the references cited by Short and any issues of patentability raised by Short, in the Short Motions List (Paper 17); and FURTHER ORDERED that a copy of this judgment, a copy of the decision on the Short motions (Paper 63), and a copy of the Short motion list (Paper 17) shall be entered into the administrative record of Short patent 6,605,449 and Patten application 10/646,221.

Claim 8 of the '449 patent is indefinite at least because a polyketide is not a protein or polypeptide. There are no polynucleotides that encode a polyketide. Claim 12 of the '449 patent is indefinite at least because "step of (c)" has no antecedent basis in Claim 1. <u>Unpatentability – Enablement</u> 7. Claims 1-12: § 112, First Paragraph – e.g., "progenitor nucleic acid			

35 U.S.C. § 112, First Paragraph, for failing to satisfy the enablement requirement. For example, the term "progenitor nucleic acid sequences" in Claim 1 of the '449 patent includes a plurality of identical sequences because there is no limitation that the progenitor nucleic acid sequences differ from each other in sequence. The plural "sequences" can be read to indicate two identical sequences. The '449 patent does not teach one of skill in the art how to obtain a "library" of progeny sequences from progenitor sequences that are identical to each other, especially since recombinants of two identical sequences will all be identical. In addition, the term "progenitor nucleic acid sequences" in Claim 1 of the '449 patent is overbroad because it includes sequences that do not have areas of homology and because it includes sequences having as few as two nucleotides. The '449 patent does not teach one of skill in the art how to align such sequences nor how to determine demarcation points in such sequences in order to generate a plurality of pre-determined building block sequences.

Redefine the Scope of the Interference – Substitute Count 1 with Count 2

8. Motion under 37 C.F.R. §§ 41.121(a)(1)(i) and 41.208(a)(2) seeking to redefine the scope of the interference by substituting Count 2 for Count 1. Specifically, Patten asserts that Count 2, an alternative count consisting of Claim 6 of the '449 patent OR Claim 275 of Patten's involved U.S. Patent Application Serial No. 10/646,221 ("the '221 application"), should be substituted for Count 1. Claim 1 should not be part of a Count because it is not patentable, at least for the reasons above, and because Claim 1 is not patentable under 35 U.S.C. § 101 because it lacks utility. Claim 1 lacks utility because there is no requirement that the progenitor or progeny sequences encode a molecule having any function or property.
